PROFILE SUMMARY

Motivated and detail-oriented fresher actively learning and building skills in data analysis and quality evaluation, with a strong interest in digital maps and navigation systems. Currently developing hands-on understanding of map defect analysis across ETA, traffic, routing, places, and navigation. Eager to contribute to real-world projects by applying analytical thinking and problem-solving skills. Quick learner with a passion for improving user experience through accurate and reliable map insights.

EDUCATION

Teegala Krishna Reddy Engineering College **2021 -2025**
Btech/Electronics and Communication Engineering **CGPA 8.5/10**

TECHNICAL SKILLS

Data Analysis: Data Cleaning, Data Wrangling, EDA, Data Validation
Databases: MySQL
Tools: Excel, SQL, Python, Power BI
Python Libraries: Pandas, NumPy
QA & Process: Quality Checks, Reporting, SOP Awareness
Soft Skills: Analytical Thinking, Attention to Detail, Communication, Adaptability

INTERNSHIP

Tata Group – GenAI-Powered Data Analytics Virtual Experience. **Forage, July 2025**

- Learned how to use AI tools to understand and analyze data.
- Found patterns in financial data to help identify customer risks.
- Created a simple, no-code model to predict which customers might not repay on time.
- Designed a fair and responsible AI-based strategy to improve collections.
- Gained practical experience in using AI for real business problems.

PROJECTS

Super Store Sales Analysis using Power Bi **Jan 2024**

- I have analyzed the sales data for getting insights about regions, category, sub category, etc. likewise sales using line chart, stacked bar chart, map chart, etc.

Remote Controlled Surveillance Robot

- Designed and implemented a **wireless-controlled surveillance robot** using **ESP32-CAM, DC motors, and Raspberry Pi 3**, enabling real-time video streaming to Android smartphones via Wi-Fi.
- Developed a **mobile-controlled navigation system** allowing remote operation through IoT-based Android Chrome application.

Hand Sign Detection (ASL)Using AI And Image Processing

- Designed and implemented a real-time **ASL hand gesture recognition system** using **Convolutional Neural Networks (CNNs)**, **OpenCV**, and **TensorFlow/Keras**.
- Developed a **two-stage pipeline**: (1) Hand sign detection & recognition, (2) Text-to-sign conversion with speech input support.
- Optimized image preprocessing with **OpenCV & MediaPipe**
- Integrated speech-to-text and text-to-sign mapping, expanding the system's usability for both **hearing-impaired users** and **ASL learners**.

CERTIFICATIONS

- Certification in Machine Learning using Python Library by NASSCOM
- Certification in Building Data Analytics Application with Cloud by EY
- Certification in Data Analytics by TATA Group.
