CAREER OBJECTIVE

A passionate and self-motivated **Electronics and Communication Engineering graduate** with strong interests in **analytics**. Skilled in Python, SQL and web technologies with practical experience gained through academic projects and a virtual internship. Eager to start a career in the **software industry** where I can apply my technical knowledge, problem-solving ability, and creativity to develop impactful solutions.

EDUCATION

Teegala Krishna Reddy Engineering College **2021 -2025**
Btech/Electronics and Communication Engineering **CGPA 8.5/10**

TECHNICAL SKILLS

Programming & Analytics: Python, sql, Data Visualization using PowerBI.
Data Tools: Power BI
Databases: MYSQL, Excel.
Tools: Git/GitHub, VS Code, MATLAB (EC Domain).
Concepts: OOPs, Data Structures
Soft Skills: Communication, Problem-Solving, Active Listening, Time Management, Leadership, Quick Learner.

INTERNSHIP:

Tata Group – GenAI-Powered Data Analytics Virtual Experience**.** **Forage, July 2025**

- Learned how to use AI tools to understand and analyse data.
- Found patterns in financial data to help identify customer risks.
- Created a simple, no-code model to predict which customers might not repay on time.
- Designed a fair and responsible AI-based strategy to improve collections.
- Gained practical experience in using AI for real business problems.

PROJECTS

Super Store Sales Analysis using Power Bi

- I have analyzed the sales data for getting insights about regions, category, sub category, etc. likewise sales using line chart, stacked bar chart, map chart, etc.

Job Portal Web Application (Django)

- Developed a Django-based Job Portal enabling candidates to apply for jobs and recruiters to post and manage openings with **secure authentication**.
- Implemented **role-based access control, resume file uploads,** and **application status workflow** (Submitted, Under Review, Hired/Rejected) using **Django ORM** and **ModelForms.**
- Designed **responsive user interfaces** using Django template language**(DTL)** and managed database operations with SQLite and version control using Git/GitHub.

Hand Sign Detection (ASL)Using AI And Image Processing

- Designed and implemented a real-time **ASL hand gesture recognition system** using **Convolutional Neural Networks (CNNs)**, **OpenCV**, and **TensorFlow/Keras**.
- Developed a **two-stage pipeline**: (1) Hand sign detection & recognition, (2) Text-to-sign conversion with speech input support.
- Optimised image preprocessing with **OpenCV & MediaPipe**

CERTIFICATIONS

- Certification in Machine Learning using Python Library by NASSCOM
- Certification in Building Data Analytics Application with Cloud by EY
- Certification in Data Analytics by TATA Group
